

## **EVONIK GROUP DEVELOPMENT**

#### **Highlights**

- Solid results in an increasingly challenging market environment:
   Adj. EBITDA of €615 m in Q3 supported by a strong Specialty Additives performance (+8% yoy)
- Volumes decline, pricing holding up: Double-digit price increases across all growth divisions resulting in ongoing successful pass-on of higher variable costs
- Cash generation picking up with FCF of €288 m in Q3; further significant NWC improvement expected in Q4 to achieve ~30% cash conversion for the full year
- Outlook for FY 2022 confirmed: Adj. EBITDA between €2.5 and 2.6 bn
- Structural support for 2023: Resilient & regionally balanced portfolio setup, progress in Perf. Materials divestment, high visibility on energy costs & gas supply, contingency measure toolbox in implementation

### **Income Statement**

- Sales increased by 26% to €4,878 m (Q3 2021: €3,871 m)
  - Another +17% pricing on already elevated prior-year basis; all divisions posting double-digit price increases
  - Revenues in T&I/Other +146% yoy (to €541 m vs €220 m prior-year quarter) due to energy purchasing for third parties
  - Volumes declining (-7%)
    - Performance Materials (-16%) negatively impacted by planned maintenance shutdown in Marl followed by force majeure of a supplier
    - Nutrition & Care (-10%) held back by ongoing customer destocking in Animal Nutrition and supply chain issues at several sites in Health Care
- Adj. EBITDA down 5% to €615 m (Q3 2021: €645 m)
  - Higher prices again compensate higher variable costs in all divisions
  - Lower volumes across majority of businesses impacting earnings
  - No impact from inventory revaluation in Q3
  - Specialty Additives proving resilience in challenging environment once more
  - Nutrition & Care facing supply chain issues in Health Care and destocking in Animal Nutrition;
     Care Solutions strong
  - Smart Materials with strong silica and silanes business, compensating lower PA12 volumes (limitations in raw materials) and weaker demand for H<sub>2</sub>O<sub>2</sub>
  - Performance Materials affected by spread normalization and maintenance in C4 chain after an exceptional Q2
- Adj. EBITDA margin declined to 12.6% (Q3 2021: 16.7%)
- Adj. EBIT of €342 m (Q3 2021: €387 m)
- Adj. EPS declining 6% to €0.54 (Q3 2021: €0.58)
  - Less negative adj. net financial result mainly due to higher interest income (higher discount rate on other provisions)

### **Cash Flow Statement**

- Free cash flow positive in Q3 at €288 m (Q3 2021: €524 m)
  - Cash generation picking up in Q3 and pointing into the right direction despite significant NWC headwind
  - o Implemented inventory optimization measures starting to take effect and set to continue in Q4
- Free cash flow 9M 2022 at €182 m (9M 2021: €937 m)
  - Free cash flow remains heavily impacted by significantly higher NWC outflow yoy (delta
     ~€500 m yoy) driven mainly by inventories and payables
  - o Additionally, yoy higher cash outflow for variable remuneration (in Q2 2022 for FY 2021)

## **Balance Sheet**

- Net financial debt of €3,807 m; basically unchanged vs. end of Q2 2022 (€3,836 m)
- Pension provisions lower at €1,655 m (Q2 2022: €1,780 m) due to further slight decline in Q3 after another increase of pension discount rates (German pension discount rate increased from 3.3% to 3.9%)
- Leverage (adj. net debt / adj. EBITDA) of 2.0x (Q2 2022: 2.1x); net financial debt leverage of 1.4x

## **DIVISIONAL BUSINESS DEVELOPMENT**

## Specialty Additives (SP)

- Overall strong performance across all businesses demonstrating resilience in tougher environment
- Price increases continue on similar strong level as Q2 (+18% yoy) and compensate for higher variable costs
- Volume declines in Europe and Asia, volume expansion in Americas
  - o Good demand in agro, energy storage and release coatings
  - Weaker demand and destocking esp. from coatings and construction
  - o Unplanned downtime in Crosslinkers

### Nutrition & Care (NC)

- Care Solutions: Strong volumes and pricing esp. for cosmetic solutions and active cosmetic ingredients
- Health Care: weak quarter with supply chain issues at several sites resulting in lower deliveries to customers, catch-up in Q4
- Animal Nutrition: Only slow demand recovery in Q3 (qoq); ongoing customer destocking across all regions and impact of global inflation on meat consumption in low-income countries

# Smart Materials (SM)

- Stable volumes despite weaker demand in construction and limitations in raw materials for PA12 (C4 maintenance)
- Continued strong growth in Silanes and Silica, driven by automotive demand, oral care, electronics and special oxides
- Active Oxygen's base business affected by current gas price
- High demand for "Eco-Solutions" like active oxygen specialties and gas separation membranes
- Price increases in same magnitude as previous quarter, continue to compensate higher variable costs

### Performance Materials (PM)

- Lower earnings after exceptional Q2 driven by lower volumes in C4 business: Planned maintenance shutdown in Marl followed by force majeure of a supplier
- Weaker development across all C4 market segments, most pronounced in INA and plasticizers (lower demand from construction and automotive)
- C4 spreads down from peak levels, additional margin impact from lower Naphtha price and increased energy costs

### Technology & Infrastructure (T&I)/Other

- Revenue up +146% yoy (to €541 m) due to energy purchasing for third parties (pass-through to customers, no effect on earnings)
- Adj. EBITDA clearly better yoy and qoq due to re-distribution of negative effects (esp. higher costs for power plants and energy purchasing) in Q2 to operating businesses

## **OUTLOOK FY 2022**

#### Basis for the outlook

- GDP growth expectation lowered to 2.6% (previously (with Q2 reporting): 2.7%)
- Internal raw material cost index significantly higher than in FY 2021 (unchanged)

## Group outlook

- EBITDA outlook for the year confirmed
  - o Adj. EBITDA between €2.5 and 2.6 bn
  - Implying +7% growth yoy at mid-point
  - Strong 9M performance as basis (+10% yoy)
  - o Assuming similar pace of macro slowdown for Q4 like in Q3
- Energy supply:
  - o Outlook based on sufficient gas supply to maintain production on necessary scale
  - Extensive measures implemented to make energy production at European sites largely independent from Russian gas
- Sales: around €18.5 bn (previously: between €17 and 18 bn; FY 2021: €15.0 bn)
- Adj. EBITDA: between €2.5 and 2.6 bn (unchanged; FY 2021: €2,383 m)
- FCF: FCF conversion of around 30%, leading to yoy lower absolute FCF (unchanged; FY 2021: cash conversion 40%; FCF €950 m)
- Capex: around long-term sustainable level of €900 m (unchanged; FY 2021: €865 m)
- ROCE: slightly above the level of 2021 (unchanged; FY 2021: 9.0%)

## Divisional indications for adj. EBITDA

- Specialty Additives: "slightly above prior year level" (unchanged; FY 2021: €920 m)
- Nutrition & Care: "on prior year level" (previously: considerably above prior year level; FY 2021: €717 m)
- Smart Materials: "considerably above prior year level" (unchanged; FY 2021: €650 m)
- Performance Materials: "significantly above prior year level" (unchanged; FY 2021: €317 m)

## Additional indications (all unchanged)

- EUR/USD sensitivity: +/-1 USD cent = -/+ ~€6 m adj. EBITDA (FY basis)
- Adj. EBITDA T&I/Other: considerably less negative than prior year level (unchanged; FY 2021: -€221 m)
- Adj. D&A: slightly above the level of 2021 (unchanged; FY 2021: €1,045 m)
- Adj. net financial result: slightly less negative than 2021 (unchanged; FY 2021: -€97 m)
- Adj. tax rate: around long-term sustainable level of ~30% (unchanged; FY 2021: 28%); higher compared to previous years, amongst others due to changes in international tax legislation
