Essen, Germany. Evonik has invested in the startup OPTIfarm Ltd. through its venture capital unit and now holds a minority stake in the company, which is headquartered in Chesterfield (United Kingdom). OPTIfarm is already generating revenue through delivering round the clock monitoring of poultry houses, ensuring better animal welfare, improving livestock performance and enabling fail-safe operations. OPTIfarm's team uses whatever imagery, automation and sensors that are already available, including temperature, water and feed. This allows checks to take place from afar. Any issues can be discovered and corrected quickly, saving the farmer time and money.

The transaction took place in the context of a spinout of OPTIfarm from the Applied Group. The parties have agreed not to disclose the amount of the investment.

"We are impressed with the global commercial success that OPTIfarm has already achieved," says Bernhard Mohr, head of Venture Capital at Evonik. "Evonik possesses the ideal experience and expertise to support OPTIfarm through further growth."

The OPTIfarm services and business model was developed by poultry producer and entrepreneur David Speller as part of his existing business. Speller said, "I am delighted that the investment from Evonik enables OPTIfarm to now operate as a focused standalone company. With heritage as a poultry producer and a unique pay as you go business model, OPTIfarm is now positioned to serve a larger number of poultry farmers."

"OPTIfarm is an excellent strategic fit for Evonik's developing precision livestock business," says Emmanuel Auer, head of the
