A high-ranking delegation led by Governor Wang Rulin of China's Jilin Province visited Evonik Industries on June 15 and 16 in Essen, Germany. The meeting of the Chinese delegation with Members of the Evonik Executive Board Dr. Klaus Engel and Dr. Dahai Yu served to build and deepen a trusting partnership between Jilin Province and Evonik.

During the two-day meeting, Evonik and representatives of the delegation signed an agreement for a non-exclusive license to build and operate an HPPO (hydrogen peroxide for propylene oxide) plant at the Jilin site in Northeastern China. The license agreement will allow a yet-to-be-established joint venture between Jilin Shenhua and Jilin North Chemical Company (JNCC) to build a facility for the production of 300,000 metric tons of propylene oxide, which will operate on the basis of a process developed by Uhde and Evonik. Propylene oxide is a raw material for polyurethane foams, which are used for building insulation, furniture upholstery, and lightweight motor vehicle construction.

"We're pleased to have gained a partner in Jilin Province for the attractive Chinese market," said Dr. Yu, member of Evonik's Executive Board responsible for Asia, in his welcome remarks to the 35-person delegation. "Our strength to develop new and innovative technologies is impressively documented by the second successful licensing of the HPPO procedure," added Dr. Engel.

Last year, Evonik posted revenues of over €1 billion in China, Hong Kong and Taiwan (Greater China) where it employs more than 3,500 people. The Group manages its activities in China from Shanghai, where Evonik operates a large R&D center, a production site of its own, and a multi-user site at SCIP (Shanghai Chemical Industry Park). Over the past years, Evonik has invested over €300 million in Shanghai. Additional investments are planned in the
